

## Danny the Champion of the World

### WRITING A STORY:

1. PLAN your story or essay.

- Jot down in order all the things you could write about in your story.
- Single words, short headings or sentences will do
- Now decide which of these ideas you wish to keep or leave out.
- Decide what order to put your ideas into before you begin to write. You could number these in your plan.

2. DRAFT using double line spacing.

- Now begin to write your story using the plan you have drawn up.
- Remember to write in good sentences
- HEAR what you write in your head
- Keep reading back over what you are writing to check if the sentences are making sense.
- LISTEN carefully to what you write to make sure the sentence flow smoothly.
- Take a new paragraph for each new part of your story.

3. WRITE the final draft of your story/essay

- Read over your first draft and make the necessary changes.
- Now write out the final draft of your story carefully.
